Claim Chart U.S. Patent No. 10,863,837 Infringement: Bedmate-U FitNek Pillow

'837 Patent, Claim 1	Bedmate-U FitNek Pillow
1. A pillow, consisting of:	The Bedmate-U FitNek ("FitNek") is a pillow. Source: www.bedmate-u.com (last accessed August 3, 2022)
	FitNek Pillow: Say Goodbye to Sleepless Nights Just a pillow. But cooler. Much MUCH Cooler. Bedmate U 1 Campaign New Castle, United States Source: https://www.indiegogo.com/projects/fitnek-pillow-say-goodbye-to-sleepless-nights#/ (last accessed February 2, 2022)

'837 Patent, Claim 1

a first pillow cushion defining a first major surface of the pillow, consisting essentially of a gelatinous elastomer, and sized and configured to support a head and neck of a person using the pillow, deformable wall members of the first pillow cushion extending from the first major surface to an opposite surface of the first pillow cushion, the deformable wall members defining voids, the deformable wall members configured to buckle and to be displaced into the voids when a pressure applied to the first major surface of the first pillow cushion in a direction perpendicular to the first major surface exceeds a threshold pressure level;

Bedmate-U FitNek Pillow

The FitNek has a first pillow cushion (hereinafter referred to as the "TPE Core").

Source: https://www.indiegogo.com/projects/fitnek-pillow-say-goodbye-to-sleepless-nights#/ (last accessed February 2, 2022)

'837 Patent, Claim 1	Bedmate-U FitNek Pillow
	Bedmate-U states that the TPE Core consists of a thermoplastic elastomeric material, which is a gelatinous elastomer.
	FitNek uses unique looking TPE triangular pillars to support your head. Thermoplastic elastomer, so called TPE is an advanced material that has elasticity of rubber and durability of hardened plastic.
	Source: https://www.indiegogo.com/projects/fitnek-pillow-say-goodbye-to-sleepless-nights#/ (last accessed February 2, 2022)
	The FitNek is 21" x 14" x 5" in size and the TPE Core is sized and configured to support a head and neck of a person using the pillow.
	Source: www.bedmate-u.com (last accessed August 3, 2022)

'837 Patent, Claim 1	Bedmate-U FitNek Pillow
	The deformable wall members of the TPE Core are configured to buckle and to be displaced into the voids when a pressure applied to the applied to the first major surface of the TPE Core in a direction perpendicular to the first major surface exceeds a threshold pressure level.

material composition different from the first pillow cushion; and	Triple layered Rayon Cover TPE Core Layer Mixed Fiber Layer Fiber Pocket Source: https://www.indiegogo.com/projects/fitnek-pillow-say-goodbye-to-sleepless-nights#/ (last accessed February 2, 2022)

'837 Patent, Claim 1	Bedmate-U FitNek Pillow
'837 Patent, Claim 1 a pillow cover enclosing the first pillow cushion and the second pillow cushion.	In the FitNek, a pillow cover encloses both the TPE Core and the Mixed Fiber Layer.

Bedmate-U FitNek Pillow
We also used Rayon yarn for the cover. Rayon yarn - also known as 'art yarn' - is an environmentally friendly material produced from wood pulp. It has a cool and soft silky texture which is great for bedding. Source: https://www.indiegogo.com/projects/fitnek-pillow-say-goodbye-to-sleepless-nights#/ (last accessed February 2, 2022)

'837 Patent, Claim 19	Bedmate-U FitNek Pillow
19. A pillow, comprising:	See Claim 1.
a first pillow cushion defining a first major surface of the pillow, consisting essentially of a gelatinous elastomer, having a first thickness, and sized and configured to support a head and neck of a person using the pillow, deformable wall members of the first pillow cushion extending from the first major surface to an opposite surface of the first pillow cushion, the deformable wall members defining voids, the deformable wall members configured to buckle and to be displaced into the voids when a pressure applied to the first major	See Claim 1. See Claim 1.
surface of the first pillow cushion in a direction perpendicular to the	
first major surface exceeds a	
threshold pressure level;	

a second pillow cushion coupled to the first pillow cushion at an interface, defining a second major surface of the pillow opposite from the first major surface, having a second thickness that is greater than the first thickness of the first pillow cushion, and having a material composition that differs from a material composition of the first pillow cushion; and See Claim 1.

The FitNek's Mixed Fiber Layer has a second thickness that is greater than the first thickness of the TPE core.
